U. S. DEPARTMENT OF AGRICULTURE
AGRICULTURAL MARKETING SERVICE
Dairy Division Washington, D. C.

PREFACE

The dairy processing plants listed in this publication are approved for USDA grading service. Such service is limited to the product(s) shown as manufactured by the respective plant and does not constitute an endorsement of quality unless the product also has been inspected and meets U.S. Grade Standards or other quality specifications of buyer and seller. Official plant approval is based on compliance with the Dairy Division Regulation, "General Specifications for Dairy Plants Approved for USDA Inspection and Grading Service." Approval is determined by a detailed inspection of over 100 items including milk supply, plant facilities, condition of equipment, sanitary practices, and processing procedures.

The USDA Plant Inspection Program is widely used by the dairy industry. It is recognized by dairy plant managers as an important means for improving and maintaining a sound operation for the production of products that will meet specific grade or contract requirements, and have uniform quality essential for buyer and consumer approval and protection. Buyers, too, find this publication a reliable guide to sources for dependable dairy products.

The Inspection and Grading Branch also provides service under its Resident Grading and Quality Control Service. Plants using this service are shown in this publication with an asterisk. This full-time Program offers on-the-spot official grading of the plant's manufactured products, laboratory testing and quality control and plant inspection services. The Resident Program also makes available to the plant manager, the technical know-how and experience of the Inspection and Grading Branch supervisory staff, including chemists and bacteriologists, for help in solving product quality problems.

The Plant Inspection, Resident Grading and Quality Control Services are available on a voluntary basis, and fees are charged to cover costs. Managers of dairy plants or other interested parties may obtain information about these services by contacting the Inspection and Grading Branch area office nearest them. (See directory of offices inside of back cover.)

Plants listed in this publication are identified (where available) by State-assigned code numbers in accordance with the national uniform coding system. This system identifies the plant by means of nationally recognized code numbers on the package. In this manner, processed products can be readily identified as the code will show numerically the State of origin and plant of origin within that State. Each state has been assigned a two-digit number and appears in this publication following the name of the State. The State-assigned plant numbers identifying the plant precede the plant name.

This publication is revised every three months to reflect changes in plant approval and to include new plants.

USDA inspection and grading services are performed under the "USDA Regulations Governing Grading and Inspection of Manufactured or Processed Dairy Products," Title 7, Chapter I, Part 58, Sections 58.1-58.63, of the Code of Federal Regulations.

Codes listed below denote products which are eligible for

Please note that two code numbers are shown for each State. The numbers immediately following the State names were newly assigned by the National Bureau of Standards under provisions of Public Law 89-306 and replace codes formerly in use. Both codes will be shown in subsequent issues, during the period of transition to use of the new State codes on packaged dairy products to identify the manufacturing plant. (Plant numbers within a State remain unchanged.)
